System Administration Experience

Windows Server 2022 | Active Directory Home Lab

- Configured Windows Server 2022 as a domain controller, establishing a simulated corporate environment.
 - Created and managed organizational units (OUs), users, and groups in Active Directory to control access and permissions.
 - Installed and configured Sysmon on Windows 10 and Windows Server 2022 to enhance system monitoring and logging.
 - Deployed Splunk Universal Forwarder on Windows machines to collect and forward logs to a Ubuntu Server for analysis.
 - Generated and analyzed login event logs in Splunk, identifying successful and failed authentication attempts.
-

Work Experience

Night Auditor | Nurai Island, Abu Dhabi, UAE | *June 2021 – August 2023*

- Audited 100+ daily financial transactions using hotel management software, ensuring data accuracy.
- Provided technical support, resolving 15+ guest IT issues per shift (e.g., Wi-Fi, systems).
- Reported directly to GM and Front Office Manager before morning briefings, delivering operational updates.
- Handled guest complaints efficiently, cutting resolution time by 10%.

Guest Service Agent | Grand Millennium Al Wahda, Abu Dhabi, UAE | *August 2018 – February 2020*

- Welcoming guests as they arrive at the property, ensuring a high level of professionalism and customer service
- Administering check-in process for VIP guests, including key issuance and ushering to their rooms
- Monitoring phones and e-mails to address guest inquiries before, during, and after their stay
- Creating and updating reservations through our digital booking system
